SUMMARY -----

Network Engineering student pursuing a BSc (Hons) in Ethical Hacking & Network Security, with hands-on experience in secure network design and server configuration. Strong foundation in Cisco networking and Red Hat administration, with a growing interest in cybersecurity.

TECHNICAL SKILLS -----

- Networking: Network Design, Subnetting, VLANs, Routing & Switching, ACL Configuration
- Network Security: pfSense Firewall Configuration, Access Control Lists (ACLs), Basic Cybersecurity Practices
- Systems & Servers: Linux (Red Hat/CentOS), Server Configuration, Master-Slave Server Setup
- Tools & Technologies: Cisco Packet Tracer, Wireshark (basic), Virtual Machines (VMware)
- IoT: Smart Home System Development, Sensor & Device Integration
- Networking Concepts: TCP/IP, DNS, DHCP, NAT, Network Troubleshooting
- Databases: MySQL (Basic)

PROJECTS & EXPERIENCE -----

- Designed and implemented a secure network infrastructure as the final project for my Diploma, demonstrating practical skills in network planning, configuration, and security.
- Developed and configured a network architecture with master and slave servers for the SA1 coursework, focusing on server synchronization and system reliability.
- Built a smart home automation system for the IoT project, integrating sensors and devices to enable efficient monitoring and control.
- Configured and implemented a pfSense firewall and HA Proxy setup for the SA2 coursework to enhance network security, load balancing, and traffic management.

EDUCATION -----

- BSc (Hons) Ethical Hacking & Network Security—2024 – 2028, In Progress, National Institute of Business Management
- Higher National Diploma in Network Engineering— 2025 – 2026, In Progress, National Institute of Business Management
- Diploma in Network Engineering— 2024 – 2025, National Institute of Business Management
- High School (OLs/ALs), D.S. Senanayake Collage Colombo 7.

CERTIFICATIONS & ACHIEVEMENTS -----

- Red Hat Certified System Administrator (RH124) – Completed
- Red Hat Certified System Administrator (RH134) – Reading
- Cisco CCNA: Introduction to Networks — Completed
- Cisco CCNA: Switching, Routing & Wireless Essentials — Completed
- Cisco CCNA: Enterprise Networking, Security & Automation — Completed
